Pavani V	Test Lead
Olivia Sam	Developer

Modified Problem Statement

Many users sign contracts without understanding complex legal terms, leading to hidden risks and financial loss.
There is no simple way to identify penalties, unfair clauses, or actual financial impact before signing.

User/ Customer Understanding

Ideal Customer Profile (ICP)

Demographic Profile (The "Who")

- Individuals, freelancers, startups, and small businesses
- Age: 20–50 years
- Income group: Middle to upper-middle
- Frequently deal with contracts
- Geography: Urban areas (Bengaluru, Hyderabad, Mumbai)

Psychographic Profile (The "Mindset")

- Fear of hidden clauses and penalties
- Want quick and simple understanding
- Not legally trained
- Prefer automated and easy tools
- Need clarity before signing agreements

Customer Persona (CP)

Persona Name: Rahul Sharma (32)
Profession: Freelance Software Developer (Bengaluru)
Role: Independent Freelancer (IT Services)
Scale: Works with 5–10 clients monthly; handles multiple contracts regularly
Team: Works individually; no legal or financial advisor
The Problem:
Signed a client contract without fully understanding a clause and lost ₹50,000 due to an early termination penalty.
The Goal:
Wants to clearly understand contract terms, especially payment and penalty clauses, before signing.
The Driver:
Needs a simple AI tool that explains contracts in plain language and shows financial impact instead of complex legal documents.

Product USP

- Simplifies complex contracts into easy language, saving time and confusion
- Detects hidden risks, penalties, and unfair clauses before signing
- Calculates real financial impact, helping users avoid unexpected losses
- Provides AI chatbot for instant contract-related queries
- Unique combination of contract analysis + risk detection + financial simulation in one platform
- Unlike other tools, it focuses on both legal understanding and financial intelligence

Use Cases & High level Requirements

1. Contract Risk Analysis
Input: Upload agreement
Output: Highlighted risks + clear summary

2. Clause Simplification
Input: Complex legal text
Output: Simple, easy-to-understand explanation

3. Missing Clause Detection
Input: Draft agreement
Output: Alerts for missing critical clauses (e.g., termination, penalties)

4. Payment & Liability Breakdown
Input: Financial clauses in contract
Output: Clear breakdown of payment structure and user obligations
